

Paired Safety Leadership Tours focus on getting senior leaders to step away from their desk to make regular visits to different worksites to talk directly with the people on the tools about the safety issues that relate directly to them - because strong safety leaders do not rely on assurances from others that all is fine - they go and find out for themselves.

Senior leaders engaging in safety conversations directly with the on-site workforce

The Working Group has developed a handbook for member companies of Safer Together that provides guidance for managers on how to conduct effective safety leadership tours, including tips for holding effective safety conversations
