2025 HSER Forum Process Safety for the Frontline

In 2024, you told the Frontline Health, Safety and Environment Representative (HSER) Program Team that the area of most concern when it came to the health, safety and wellbeing of your teams were risks associated with Process Safety. Our 2025 HSER Forum in Perth responded, with the theme 'Process Safety for the Frontline'.

Psychological and Psychosocial Safety Resources Portal

Psychological and Psychosocial safety hazard risks are an increasing focus of attention when it comes to safety in our industry. Our Health Working Group has created a one-stop Psychological and Psychosocial Safety Resources Portal collating all related materials, to better enable HSERs to access and share resources with your teams.

Line of Fire Mini Portal Refresh

Our Rig Site Safety Working Group has recently undertaken a refresh of the Line of Fire mini portal, to update the content, raise awareness about Line of Fire risks focusing on People, Energy and Equipment, and develop a video campaign around the Play/Pause concept – it's OK to pause, be in the moment, and re-set our awareness to avoid being in the line of fire.
