

Safer Together Regional Roadshow

LOCATION AGENDA

Industry Safety Induction - Implementation Support Workshop

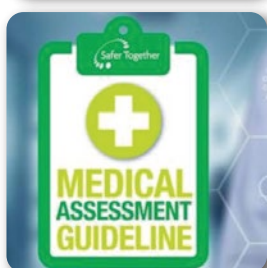

Why Attend?

The Industry Safety Induction (ISI) has recently been refreshed to include Assist and Assure familiarisation for frontline workers in the ISI content. In addition, the Experienced Worker process will shortly be upgraded to make it more efficient for those continuing to work in our industry. This interactive workshop will explain these recent and upcoming changes, answer some Frequently Asked Questions (including dispelling a few myths), and step through a deployment case study from an Operating Company that details how they have optimised their induction process to align with the ISI.

Who Should Attend?

Anyone involved in coordinating recruitment, onboarding, training and mobilisation of personnel to site, including:

- Learning and Development focal points
- Training Managers
- Operations Coordinators

Health and Wellbeing - Implementation Support Workshop

Why Attend?

Part 1 - Roadmap for Managing Psychosocial Hazards in your Workplace

Interactive workshop focused on building capability to identify and respond to psychosocial hazards in your workplace using practical tools that will help you support employee wellbeing and create a positive, inclusive, safe work environment. These resources are free-of-charge and are available for member companies of the Safer Together community to pick up and use.

Part 2 - Commit to Fit! An Update on the Fitness to Work (FTW) Medical Assessment Guideline

You spoke and we listened...get an update on how we've responded to the questions and feedback received during the March 2026 Regional Roadshow.

Who Should Attend?

Anyone involved in the design and coordination of workplace strategies that support employee physical, mental and psychosocial health and wellbeing, including:

- General Managers
- Operations Coordinators
- Human Resource Managers
- Occupational Health Managers and Advisors

Operating Facilities Safely How do we know we have the fundamentals right?

Why Attend?

Getting the fundamentals right has consistently proven to be the difference between an ordinary day's work and a major incident. The Process Safety Working Group will introduce the Process Safety Fundamentals as a common language for covering the key front-line safety controls. This will create a discussion in the room about how they are used locally as part of controlling Operating Integrity. The Working Group wants to find out what information and support they can provide to the front line and will use the results of the discussion to help them deliver what's needed.

Who Should Attend?

Anyone who has a role in operating, maintaining or supporting the plant or who is involved in the supply chain that keeps the facilities going.

Member Engagement Evening

Why Attend?

- Meet executive leaders from our Safety Leaders Group and give them your feedback about your experiences as a member of Safer Together.
- Connect and engage with senior field leaders and key frontline field leaders from other member companies in the local region in a relaxed, informal setting.
- Tell us your ideas for how we can help support you to adopt, use and embed Safer Together products and programs within your company.

Who Should Attend?

Locally based Senior Field Leaders and key Frontline Leaders of Safer Together member companies with activities / facilities in the local region.

(Ideally no more than 2 representatives from each company)

REGISTRATIONS CLOSE 17th August 2026
